

# How will the new CMS HCC model impact you?

The v28 risk adjustment model removes \$11B in annual Medicare spending. Our analysis will help you minimize that loss.

## RAF is Expected to Drop

## Fewer codes and revised HCC weighting will exert both downward and upward pressure

## The Impact Will Be Profound by 2026\*

**~11%**  
Drop in Total Raw RAF

**~18%**  
Drop in Clinical RA Score

\*Data source: Analysis conducted using proprietary data in the Curation Health Platform.

## Better Care, Quality & Performance is Possible Under the New Risk Model

Medical Category	Your Net Revenue Change (v24 to v28)		Benchmark Net Revenue Change (v24 to v28)	Your Potential Opportunity
Diabetes / Metabolic Disorders	(\$6.5M)		(\$4.9M)	+14%
Vascular	(\$5.5M)		(\$5.2M)	+15%
Autoimmune Disorders / Musculoskeletal	(\$3.1M)	×	(\$2.6M)	+17%
Blood Disorders & Infections	(\$3.1M)		(\$2.3M)	+13%
Heart	+\$730K	×	+\$4.3M	+15%
Kidney / Renal	+\$865K	×	+\$1.5M	+10%
Eyes	+\$906K		+\$991K	+3%
Cancer	+\$3.3M		+\$5.3M	+14%

Our impact analysis will help you close achievable care gaps and identify new opportunities to reverse the loss from v28
